GUATEMALA.

*Report from Guatemala City—Epidemic smallpox—Compulsory vaccination ordered.*

The following is received from Minister Heimke, under date of December 21:

Diligent inquiry has convinced me of the fact that smallpox is spreading in the city of Guatemala with alarming rapidity. Since the beginning of the epidemic, 600 cases of smallpox, with 200 deaths,

have been officially reported, and 120 cases are reported as being in the lazaretto of the city.

On further inquiry I have found that the city is literally honey-combed with the disease; that there are between 2,500 and 2,800 cases of smallpox at this capital; that there are about 220 cases in the lazaretto (designed to accommodate only 80 patients); that new cases presenting themselves at the lazaretto are being sent away and returned to their houses for lack of room, and that the actual death rate is about 30 per cent. Every passenger arriving by steamship at any of the ports of Guatemala is required to undergo immediate vaccination, but no passenger leaving Guatemalan ports, either for the United States or for any other country, is required to subject himself to vaccination.

The heaviest, and I may say almost the only, passenger traffic between the United States and Guatemala is between New Orleans and Puerto Barrios.

The situation has become so serious that the President of the Republic has found it expedient to issue a decree for the public safety against the further spread of the disease, in which he makes it obligatory upon every person residing in this Republic, without distinction of class, age, sex, or condition, to be vaccinated, under penalty of the payment of a fine for an infringement of the prescriptions of the decree in question.

##### *Plague rats at Hilo.*

Doctor Currie further reports, January 2:

■ A sanitary inspector of the territorial board of health reported from Hilo, December 19, 1908, that a number of rats had been found dead in a stable in that city and that smears made from them suggested plague infection. Some cultures from them were sent here.

Other dead rats have been found since in the same locality and additional cultures have been sent here. In all 40 dead rats have been obtained from the stable in question, and I am able to confirm the diagnosis of plague in the case of 3 rats.

Temporary Chief Quarantine Officer Moore further reports:

#### PHILIPPINE ISLANDS.

*Reports from Manila—Cholera in Manila and the Provinces—Cholera decreasing in Manila—Inspection of vessels—Quarantine transactions, October, 1908.*

Chief Quarantine Officer McClintic reports, December 8:

Week ended December 5.

Seven new cases of cholera with 5 deaths were reported for the city of Manila.

Cholera is gradually disappearing from the city, only a few sporadic cases being reported during the past week. The house-to-house inspection that was again put in force a week or so ago has been discontinued, as it did not show that the decrease in the number of cases was largely due to concealing and not reporting cases.

The bureau of health is making every endeavor to improve the sanitary condition of the city, particularly in the tenement districts, in order to prevent further outbreaks of the disease in the future. The extent of the undertaking may be appreciated when it is taken into consideration that much of the land in Manila is low and marshy, and that many of the lower classes have their homes in these wet, insani-  
tary localities.

During the week the following cases and deaths were reported as having occurred in the provinces:

| Province.              | Cases. | Deaths. |

During the week consular bills of health were issued as follows: December 4, the British steamship *Seneca*, with 49 in the crew and with 1 passenger, en route from Macassar to Boston and New York, was granted a supplemental bill of health after the usual inspection of cargo and personnel.
